

INFORMATION FOR INTERNATIONAL STUDENTS. DEGREE OF MEDICINE

The academic year is divided into two semesters: mid-September to the beginning of February and the beginning of February to the end of June.

Our students start clinical practices in hospital wards during the second academic year. The attendance at these practices is compulsory. Student groups are organized at the beginning of the academic year. Therefore, we recommend that international students who wish to attend clinical practices come during the first semester, since it is more difficult to secure available spots in the second semester.

From a total of 360 ECTS, 24% (87) consist of clinical practices, 54 clinical practice ECTS are done in the 6th year.

BOLOGNA STUDY PLAN: Subjects, schedules and syllabus can be found on the web page: <http://www.graumedicina.udl.cat/ca/index.html>.

Clinical practice: to undertake clinical practices, the students must have passed the corresponding theoretical subjects. A maximum of three months of practices per student will be available.
